12 Aug 1909

Beulah House

Buxton

Dear Sir

I acknowledge receipt of your card, which has followed me here. I am away from Tetland for two months for change. My meteorological instruments I have left in charge of Mr. J. B. Garlick, the local postmaster. I expected him to have sent on the July sheet to me at the end of July, but he has not done so. I have written to him twice but can get no reply. He has done the work for me for several summers.

yours sincerely

John Dover.

FORM A2. BRITISH RAINFALL. 1 SEP 1910

Kept at Knighton Water Works

in the County of I.W.

by J. T. Harvey

RAIN GAUGE: Pattern Negretti & Zambra 1/2 0 Diameter of top 8 in.
Height of top above Ground ~~7 3~~ ft.
" " " Sea Level 73·35 ft.
Time of Observation 9 a.m.

Nearest Railway Station: Name J. T. Harvey
Distance 1 mile Direction South.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A 2.
BRITISH RAINFALL.
18 APR 1910

Kept at The Grammar School Newport

in the County of Isle of Wight (Hampshire)

by C. D. Vibert

RAIN GAUGE — Pattern ; Diameter of top 4 in. ; Height of top above Ground 1 ft. in. ; " " " Sea Level 65 ft.

Time of Observation 9.0 a.m.

Nearest Railway Station — Name Newport I. of W. ; Distance ¼ mile Direction N.E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL. 28 JAN 1911

Kept at The Grammar School, Newport

in the County of Isle of Wight Hampshire

by C. D. Vibert

RAIN GAUGE: Pattern ____ Diameter of top 5 in. Height of top above Ground 1 ft. ____ in. " " " Sea Level 45 ft.

Time of Observation 9.0 a.m.

Nearest Railway Station: Name Newport, I. of W. Distance 300 yds. Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

8 JAN 1910

Kept at Sandown Free Library (back room)

in the County of Isle of Wight

by C. E. Gilchrist

RAIN GAUGE: Pattern ____ Diameter of top ____ in. Height of top above Ground ____ ft. ____ in. " " " Sea Level ____ ft.

Time of Observation ____

Nearest Railway Station: Name ____ Distance ____ Direction ____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A. 2/+ BRITISH RAINFALL.

25 JAN 1911

Kept at Totland Bay, Aston House

in the County of Isle of Wight

by J Dover

RAIN GAUGE — Pattern ____ Diameter of top ____ in. Height of top above Ground ____ ft. ____ in. „ „ „ Sea Level ____ ft.

Time of Observation ____

Nearest Railway Station — Name ____ Distance ____ Direction ____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL. 19 FEB 1910

Kept at Flint-Cottage Ventnor

in the County of Isle of Wight.

by J. S. Imeson

RAIN GAUGE: Pattern Snowdon; Diameter of top 5 in.; Height of top above Ground 1 ft. 0 in.; " " " Sea Level 99 ft. 0

Time of Observation 9 a.m.

Nearest Railway Station: Name I of W Rail^y; Distance ½ m. Direction NW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910.

FORM A2. BRITISH RAINFALL.

15 FEB 1911

Kept at Flint Cottage Ventnor

in the County of I of W

by John S. Imeson

RAIN GAUGE: Pattern Snowdon; Diameter of top 5 in.; Height of top above Ground 1 ft. in.; " " " Sea Level 100 ft.

Time of Observation 9. AM

Nearest Railway Station: Name I of W; Distance ___ Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.
